at advanced fleet cost savings

5 ways to save fleet time and costs

Duty of care

Meeting duty of care requirements offers real payback through fewer accidents and lower repair bills. Insurance premiums do not rise as quickly and can even be reduced. You also avoid the risk of prosecution and penalties. Cut long-term costs rather than taking expensive short-term risks.

Workshop bills

Service and maintenance costs are not set in stone. Major savings are available, including significant discounts on parts, tyres and other consumables – plus free pick-up and delivery. Cut main dealer prices by up to 50%, with fleet discounts offered. Reduce running costs by looking more closely at them.

Don't forget fuel

Minimise the cost of your diesel and petrol with the right fuel card. Look more closely at price discounts, hidden extras, such as transaction fees, eliminated admin, time-saving personal service, easy VAT reclaim and full, custom reporting for smarter fuel cost management.
