Real-time visibility of your valuable equipment & cargo

As a business that operates on the road, your assets are constantly on the move. However, keeping track of them should be simple.

Our Asset Tracking solution provides live GPS tracking and simple usage reports. This helps you ensure your assets are where they are supposed to be, and reduces risk of theft or misuse.

Real-time location updates

- GPS tracking activated when movement over 2mph (90cm/sec).
- Google Maps & Layers, including street view for precise location insights.
- Customisable geofencing & Points of Interest.
- Simple movement and usage reports.

Enhanced security & theft prevention

- Tracking device installed in hidden location.
- Large battery life - keep tracking even if tracker is disconnected.
- Receive updates even when unit is stationary.
- Data helps to detect unauthorised usage.

Refrigerator unit integration

- Integration available with wide range of fridge and trailer manufacturers.
- Temperature reports including set point, return air, & supply air.
- Accurate and calibrated information for your supply chain, from collection through to delivery.
- View all temperature data for multiple compartments on same online portal.

Ensuring your assets are safe has never been easier with Motia's Asset Tracking solution. You'll get movement and usage reports that help you to make decisions that optimise the way your trailers, containers, or equipment are being used.

How does Motia's Asset Tracking work?

- 1 Install tracking devices**
A Motia engineer will install tracking devices into your assets with minimal downtime.
- 2 Monitor assets in real-time**
24/7 access to the online portal - track your assets' locations at any time!
- 3 Access helpful reports**
Understand how your assets are moving and being used, allowing you to make data-driven improvements to your business' processes.

Get the most out of Asset Tracking with advanced features

Trailer Smart.

Asset Tracking designed specifically for your vehicles' trailers

- Track your trailer's location on our easy-to-use online platform.
- When movement over 2mph (90cm/sec) is detected the Trailer Smart unit is powered up, obtains GPS and begins tracking.
- When the unit is stationary, location updates are sent at the pre-defined intervals.
- Increased battery capacity enables location even when unhooked for long periods of time. Expected battery life is based on ping intervals.
- The Trailer Smart tracking unit is a Sealed IP66 Case with integrated power cable.
- The tracking unit is located out of sight under the trailer.
- Simple, non-intrusive installation with pre-fitted EBS connector.
