Cost clarity & centralised billing

The process of obtaining job quotes, pre-authorising work and reconciling invoices can be time consuming and complicated.

With MyService.Expert, garages create job costings that are validated with an integrated rules engine, incorporating manufacturer data, meaning that you can have confidence in associated costs.

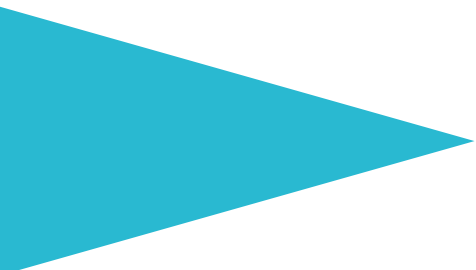

What's more, as you authorise jobs in advance, the corresponding invoice only ever reflects what was approved, enabling accurate and quicker reconciliation.

Centralised billing is supported through a HMRC compliant single vehicle maintenance invoice, enabling you to manage and pay a single provider by Direct Debit.

Paying for your vehicle maintenance through MyService.Expert means you can eliminate the time and cost-intensive exercise of drivers having to pay and reclaim through expense forms; a win-win for you and the claimant!
