

accurate mileage capture

Saving time and
money with
MileageCount

The easier way to count miles and cut costs

Managing mileage claims for a fleet of vehicles can be daunting. MileageCount makes this process easy for drivers as well as employers.

MileageCount's smart technology tracks every mile of every journey, in any vehicle: accurately, reliably and simply. Its integrated system makes it easy to submit, manage and process mileage records – saving hours of paperwork.

Reduce business
mileage claims
by up to
21%

A smart solution that soon adds up

By saving administration time, it saves you money. By reporting with accuracy, it avoids costly estimations and compliance penalties. And by organising and displaying the data clearly, it helps you identify ways to streamline your operations even further.

Industry research figures show MileageCount can reduce business mileage claims by up to 21% and you start counting the savings as soon as the system is installed, for just a few pounds a month per driver.

Helping over 25,000 fleets and counting

MileageCount is already helping over 25,000 fleets manage mileage and MPG, simplify their auditing and saving money – whilst ensuring HMRC guidelines are met.

Avoid the costs

MileageCount doesn't just help you count the savings; it helps you avoid serious costs.

Count the savings

Every company mile matters. Estimates rounded-off figures, mistakes and unrecorded journeys won't do. You simply can't afford to hope all forms are complete and accurate. With MileageCount you don't have to. Every mile is counted and reported, automatically and accurately.

HMRC requires complete, accurate mileage reporting. Every journey incorrectly reported and every mile over claimed is not just an unnecessary expense, it could also expose you to the risk of HMRC investigation and penalties. If HMRC find your records are lacking accuracy, they will fine you going back six years. MileageCount could help you avoid all fines related to mileage records.

No matter what size your fleet is or what type of vehicles you have, MileageCount gives you five valuable fleet management solutions seamlessly integrated into one system:

- 1 Mileage capture and reporting
- 2 Finance and tax service
- 3 Duty of care compliance
- 4 Fleet cost control
- 5 Grey fleet management

Combined these five solutions deliver savings on cost, time and effort:

- Reduces fleet costs
- Automates administration
- Meets HMRC guidelines
- Shrinks fraud exposure
- Tracks efficiency

Five fleet management solutions one easy system

Advantages your company can count on

You have a company to grow, not a fleet to babysit. MileageCount gives your company fast, quantifiable and assured return on investment for any size or type of fleet. It reduces business mileage claims by up to 21% for just a few pounds a month per driver. It gives you fleet management control effortlessly.

MileageCount helps reduce company spend on fuel, shrink expense claims and manage both internal and HMRC reporting. Furthermore, it proves your company's sustainability from ESOS energy reporting to comprehensive emissions monitoring – accurately and easily.

- Assured return on investment: fast and quantifiable
- Accountability and compliance: clear and unequivocal
- Full accurate reporting: MPG, emissions and ESOS
- Straightforward integration: with almost any system including fuel cards and telematics

"Using MileageCount GPS dongles is so simple that our drivers' time savings are worth in excess of £200k annually, while the recording accuracy has brought a 15-20% increase Private Mileage declaration. In looking for peace of mind on compliance, Mears found that MileageCount also delivers significant, continuing cost savings."

Mears Group

Advantages your drivers can count on

You employ drivers to drive, not to sit at the roadside completing complex and time-consuming forms. MileageCount makes it easy for them to record every trip and upload data, saving hours in lost work-time.

The risk of error is also greatly reduced when using MileageCount. Drivers no longer have to guess unrecorded mileage, or add up multiple long journeys. Data capture is all automatic, which means fast and stress-free mileage submission.

Driver recording options

MileageCount offers a range of driver recording options, all with latest technology benefits. Drivers can use a simple GPS dongle plugged into their car, then into their office or home computer, to create a report in minutes.

Or they can use an Android or iOS app for easy SmartPhone recording and download of journeys. Our iOS platform includes unique fully automated mileage recording, using revolutionary iBeacon technology.

We offer two styles of iBeacon, one running of its own battery and the other, the new USB ibeacon, running directly off the power of the vehicle, giving greater capture capabilities. Please contact us for more information.

See what our lovely customers say...

"Implementing the MileageCount solution has made collating mileage easier for the drivers and allowed Saville to produce accurate management reporting."

Saville Audio Visual

"MileageCount drives innovation and supports our customers with the pressures and complexities of managing a fleet of vehicles."

Andy Allen, UK Cards Manager, BP Fuel

"The benefits of MileageCount are proving to be considerable with reduced fuel spend and increased private mileage declaration at the forefront."

Jo Hammonds, Group Asset Manager, Mears Group

"Had a couple of phone calls with you guys recently – thanks for being helpful and really easy to deal with, would recommend your company"
